PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3+ years of hands-on experience architecting, developing, and deploying scalable web applications across monolithic and microservices-based architectures. Proficient in Angular and .NET Core, with a demonstrated history of delivering high-performance, enterprise-grade solutions aligned with business objectives.

TECHNICAL SKILLS

Languages	C#, JavaScript, TypeScript, Basic Python (FastAPI, RAG, Vector DB, Embeddings, Gen AI), SQL, PowerShell
Frameworks	Angular, ASP.NET, .NET Core
Tools & Utilities	Docker, Visual Studio 2019/2022, Git, JIRA, Burp Suite, Claude Code
Database	Microsoft SQL Server
Operating Systems	Windows
Domain	Healthcare, Revenue Cycle Management (RCM), HL7, FHIR

EXPERIENCE

Senior Full Stack Developer <i>SmartData Enterprises (I) Ltd., Nagpur</i>	Aug 2022 - Present
- Engineered and maintained scalable, high-performance RESTful APIs using .NET Core Web API within microservices architecture, supporting seamless integration and modular development. - Optimized database designs and SQL Server strategies to improve data retrieval across distributed services. - Created responsive, component-based user interfaces using Angular, enhancing usability for enterprise-level client applications. - Used Docker to containerize services, enabling consistent deployment across environments and streamlining CI/CD workflows. - Collaborated with cross-functional client teams to gather business requirements and deliver robust technical solutions aligned with project goals. - Contributed to Agile ceremonies including sprint planning, daily stand-ups, code reviews, and retrospectives. - Guided junior developers through code reviews, technical mentoring, and training programs focused on project architecture and best practices. - Worked on AWS development using IAM, EC2, VPC, subnets, Lambda functions, S3, API Gateway, CloudWatch, Route 53, and Load Balancer.	

PROJECTS

Crystel Care CRM	<i>Angular 20, ASP.NET Core .NET 8, EF Core, Dapper, SQL Server, Azure</i>
- Led a 5-member team as Lead Developer, handling client calls, JIRA tickets, PR reviews, and milestone release planning. - Used Claude Code (Opus 4.8) for faster delivery, skill markdown file management, and Product Requirements Document (PRD) creation. - Enforced multi-tenant organization-scoped data isolation through custom request middleware for secure shared-platform operation. - Built fine-grained RBAC for screen- and action-level permissions across organization, staff, and client portals, backed by Redis and in-memory caching. - Integrated Microsoft Graph for secure Microsoft 365/Azure document storage and Twilio inbound SMS workflows. - Built recurring Hangfire jobs for expiry reminders, notifications, and scheduled Xero payroll and leave-status synchronization. - Integrated Xero accounting workflows for invoice creation, payroll-calendar resolution, reconciliation, reversal/void handling, and part-paid settlement. - Delivered automated NDIS invoice generation with bulk-create workflows, travel-code billing, and duplicate-claim safeguards. - Applied leave-adjusted KPI calculations and centralized production error notification middleware.	
Anesthesia PMS	<i>Angular 14, .NET Core 5, CQRS, EF Core, SQL Server, Firebase, AWS EC2</i>
- Led a 4-member team as Lead Developer, handling client calls, JIRA tickets, PR reviews, and milestone release planning. - Integrated real-time patient vitals monitoring using Neximatic devices for live display and historical analysis. - Used the CQRS pattern to separate read and write workflows for cleaner backend services. - Built a backend pipeline to receive Neximatic vitals and relay them to an anesthesiologist iPad application through Firestore. - Built backend services to receive patient health data from Health Gorilla EHR and push updates to frontend applications. - Applied Firebase Cloud Messaging for appointment reminders, critical alerts, and chat messages. - Enforced CSRF protection using the double-submit cookie pattern with secure cookie flags and Angular X-XSRF-TOKEN headers. - Mitigated IDOR vulnerabilities through strict ownership validation and endpoint protection against parameter tampering.	
Splynt Telehealth	<i>Angular 8, ASP.NET Core 2.2, EF Core, Dapper, SQL Server, AWS EC2</i>
- Served as Lead Developer, handling client calls, JIRA tickets, and milestone release planning. - Integrated Firebase Cloud Messaging for real-time appointment, update, and reminder notifications. - Expanded RBAC for Admin, Doctor, Patient, and other roles with secure screen-level permissions. - Built an Angular Material admin dashboard for managing users, roles, screen permissions, and appointments. - Integrated Twilio voice calling with real-time transcription and AI-generated conversation summaries using Twilio and OpenAI services. - Designed a remote therapeutic manager billing module to streamline session tracking and automate billing workflows. - Built centralized error notification middleware for production exception reporting with request and API response context.	

EDUCATION

Master of Computer Applications, Babu Banarasi Das University, Lucknow Overall Percentage: 85.77%	2020 - 2022
Bachelor of Computer Applications, Babu Banarasi Das University, Lucknow Overall Percentage: 80.57%	2017 - 2020
